

FOR RESIDENTIAL AND COMMERCIAL APPLICATIONS

Aluminium high performance entrance door systems

Dutemänn Haus is a range of highly insulated contemporary aluminium entrance doors, available as a complete door set made to your specification.

FINISH

The doors can be finished in one of our standard colours or a choice of over 200 RAL colours. The powder coat finish is applied to the aluminium extrusions in a controlled factory environment ensuring a high quality finish.

Dutemänn is a trade manufacturer of quality aluminium composite entrance doors, patio doors and bifold doors. We work as a specialist aluminium door supplier to installers, developers and builders. We also supply other fabrication businesses who don't want to disrupt their core production to manufacture a non-core product.

DUTEMÄNN
exceeds expectations

Introducing the Dutemänn Haus

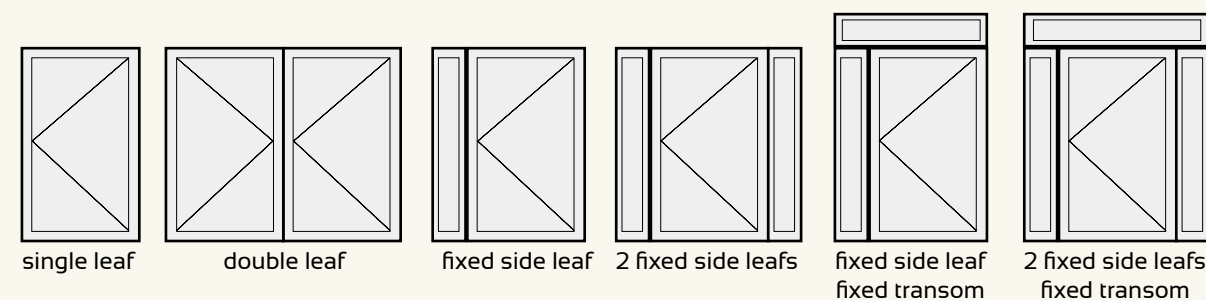

Aluminium high performance entrance door systems

All of our door systems are manufactured to exceed current U- value building regulations

DOOR OPTIONS

single leaf	maximum	double leaf	maximum	side light	maximum	top light	maximum
height	2390mm	height	2390mm	height	2390mm	height	2400mm
width	1200mm	width	2400mm	width	1200mm	width	1200mm

Style Choices

An extensive choice of styles are available that can be incorporated in almost any frame configuration. Your Dutemänn Haus door can be finished in any RAL colour, with a wide choice of ironmongery, allowing you to specify a door that suits any property style. Each bespoke door is made to measure; a single door can be manufactured to a maximum dimension of 1200mm wide and 2390mm high. Double door combinations along with top and sidelight configurations are also available.

Security

Security is always an important factor when purchasing a front door. Our product has been specifically designed with this in mind. We only fit top quality German locking systems with an automatic locking function which is the preferred specification for Secured by Design. The lock is then fitted with a 3 star security cylinder. Each Haus door is fitted with dual security hinges which are fully adjustable for your convenience.

Glazed door panels are fitted with triple glazed toughened safety glass. Side lights and top lights frames are prepared to accept 44 mm triple glazed units with beading on the inside so it cannot be removed from the outside.

Weather Resistance

Your Haus door is designed for use in all European climates. All doors have been tested to, and have passed, the very latest testing criteria for both air and water resistance. Our frames have multiple rubber weather seals ensuring your home is safe, dry and warm, even during the harshest of weather conditions.

Energy Efficient

The Dutemänn Haus Door range provides exceptional thermal performance. All of our door systems are manufactured to exceed current U- value building regulations. Our panels are 44mm thick constructed of two pressed panels of aluminium with a highly insulated inner core, this construction gives us a panel U value of just 0.71w/(m²k) for both glazed or solid panels.

When we combine our panel with our superior high insulation door system, the whole Dutemänn Haus Door is as low as 1.2w/(m²k). The combination of a thermal barrier, multiple weather seals and high performing glass maximises heat retention increasing fuel efficiency and helping to minimise fuel bills.

Panel Construction

Each Dutemänn Haus panel is a massive 44mm thick constructed from two pressed aluminium sheets on the outer faces reinforced with laminated wooden sheets all encasing the highly thermally efficient inner core.

The result is a highly stable, thermally efficient product which is unaffected by extreme weather conditions. Glazed panels are bonded into openings for security and held in place with an internal bezel.

Finish

The doors can be finished in a choice of over 200 RAL colours. The powder coat is applied to the aluminium extrusions in a factory controlled environment ensuring a high-quality finish. For coastal locations, this can be upgraded to marine grade finish.

Disabled Access

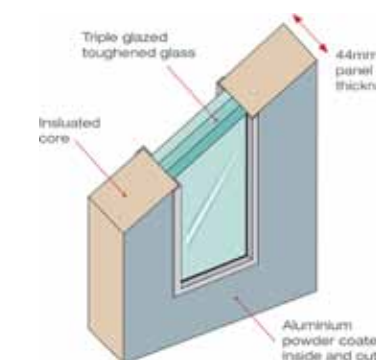

The standard weathered threshold used on the Haus Door system is part M compliant for disabled access providing the internal and external floor levels are constructed correctly (see recommended construction details).

Best Value

We offer a top quality stylish product with high insulation values. Our doors will exceed your expectations in terms of mechanical and thermal performance. We therefore believe that Dutemänn Haus is the best value contemporary aluminium door available on the market.

Simple Installation

When you purchase a fully fabricated Dutemänn Haus door set, it is pre-hung and fully tested prior to delivery. The frame is fully assembled so it can be fitted easily into your prepared opening then sealed against the structure. The door leaf is hung in place on our fully adjustable hinges to complete your installation.
